

GCCAP SAMPLE EXPORT

Airline Supplier Assurance Summary

A flight-linked assurance export for airline supplier and procurement review.

Flights	Carts	Evidence complete	Supplier review
42	360	97.5%	6
Representative day	Assigned to flights	Dispatch coverage	Exceptions

Airline view

The airline assurance summary gives a buyer-side view of which flights received complete cart evidence, which exceptions occurred before aircraft handover and whether the supplier can produce review-ready records.

Procurement use

This output supports supplier performance review, procurement clauses and evidence expectations without exposing client-private technical infrastructure.

Flight-linked assurance

Flight	Route	Carts	Evidence	Exception view
EK431	BNE-DXB	18	Complete	No exception detected
QF541	BNE-SYD	11	Complete	Review: early soak release
VA308	BNE-MEL	9	Complete	Review: truck recovery delay
SQ236	BNE-SIN	14	Partial	One cart late return

Evidence package boundary

This representative export is designed to show the expected GCCAP report structure: stage evidence, exception logic, source-retention reference, confidence and review boundaries. Client-facing versions use GCCAP Sensor, GCCAP Gateway and GCCAP Evidence Package naming only.
